**APEX**
STRIP CURTAINS AND DOORS

STRIP CURTAINS

Strip curtaining with the exclusive ball edge.

- Prevent ingress of warm air to cold rooms & refrigerated vehicles, eliminating extra compressor time in maintaining low temperature.
- Conversely prevents ingress of cold air to warm premises ensuring more healthy & acceptable working environment.
- Where good hygiene is essential, insects, dust and smoke are kept out.
- Curtain material is transparent, UV treated, will not discolour and can withstand temperatures down to minus 40°C.
- Brings you closer to truly cost efficiency operations by permitting closer control of temperature and minimizing wasted energy in extra cooling or extra heating, whichever way the problem arises.

MOUNTING

The Apex strip curtains are supplied with galvanized mounting strip complete with mounting wall brackets, bolts, nuts and washers. Two different mountings are recommended according to circumstances.

Furthermore, the individual fastening or facia strips make easy replacement of damaged or torn strips possible without having to dismantle the total curtain.

A. Wall mounting
B. Lintel/Header mounting

SELECTING THE APEX STRIP CURTAIN AND PATTERNS

Strips are available in:
- 200 mm wide x 2 mm thick
- 300 mm wide x 3 mm thick
- 400 mm wide x 4 mm thick

The strip material for low temperature and below 0°C applications, has been formulated to withstand temperatures down to -40°C, except for the 400mm wide x 4mm thick strip.

All strips are UV treated and therefore will not discolour. All strips are clear and ensure two-way visibility, except for the WELDING strip which is tinted blue, but still allowing two-way visibility.
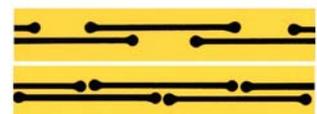

Safety strips are available in red to be used on either side of an opening to warn traffic and ensure safe movement.

Generally, where the ease of opening and going through the strip curtain is of primary concern, a LAP PATTERN should be selected.

For exterior openings (facing outside) conditions of wind, draft, noise and cold, the SHIPLAP PATTERN should be chosen.
